Introduction

An Eco Plantation Awareness Program was organized on 12th April 2026 at the Government Primary

and Higher Primary School, Dyavasandra, Harohalli Hobli, Bengaluru South.

The primary objective of

the program was to promote environmental conservation by encouraging tree plantation and creating

awareness among students, teachers, and the local community about the importance of protecting

nature.

Objectives of the Program

- To encourage tree plantation for a greener environment.
- To spread awareness about environmental conservation.
- To educate students and local people on the importance of trees.
- To inspire the younger generation to participate in eco-friendly activities.
- To promote the message of sustainable living and environmental responsibility.

Program Activities

The Eco Plantation Awareness Program included the following activities:

- A tree plantation drive was conducted within the school campus.
- Students, teachers, and volunteers actively participated in planting various saplings.
- Awareness was created among students and local residents regarding the importance of trees

in maintaining ecological balance.

- Participants were encouraged to take responsibility for nurturing the planted saplings.
- Group photographs were taken to commemorate the successful completion of the plantation drive.

Awareness Message Delivered

During the program, awareness was spread among students and the local community on the

following topics:

- Importance of planting more trees.
- Trees help reduce pollution and improve air quality.
- Role of trees in preventing global warming and climate change.
- Conservation of biodiversity and natural resources.
- Individual responsibility in protecting the environment for future generations.

The participants were motivated to plant at least one tree every year and to care for it throughout its

growth.

Participation

The program witnessed enthusiastic participation from:

- School Headmaster and Teachers
- Students of Government Primary and Higher Primary School
- Volunteers
- Community members and local residents

Everyone actively contributed to making the plantation drive successful.

Outcome

The Eco Plantation Awareness Program successfully achieved its objectives by:

- Increasing environmental awareness among students and the public.
- Promoting the importance of tree plantation.
- Encouraging collective responsibility towards environmental protection.
- Creating a greener and healthier school environment through the planting of saplings.

The event inspired students to become responsible citizens committed to protecting nature and preserving the environment.

Conclusion

The Eco Plantation Awareness Program held on 12-04-2026 at Government Primary and Higher

Primary School, Dyavasandra, Harohalli was a meaningful initiative that combined environmental

education with practical action. Through tree plantation and awareness activities, the program

highlighted the importance of conserving nature and encouraged everyone to contribute towards a

cleaner, greener, and healthier future. The enthusiastic participation of students, teachers, and

volunteers made the event a great success and reinforced the message that "Plant a Tree Today,

Save the Earth Tomorrow."
