

Program Objectives

- To enhance faculty members' understanding of the principles and practices of curriculum development.
- To provide faculty members with the knowledge, skills, and tools necessary to develop effective and relevant curricula.
- To enable faculty members to engage in evidence-based curriculum design and development that aligns with learning outcomes and assessment strategies.
- To encourage faculty members to collaborate and share best practices in curriculum development.
- To equip faculty members with the ability to critically evaluate and modify existing curricula to meet current and future student needs.
- To promote the integration of emerging technologies and pedagogical approaches in curriculum design and development.
- To support faculty members in their efforts to continuously improve their curricula and instructional practices.
- To foster a culture of innovation and creativity in curriculum development among faculty members.
- To improve student learning outcomes by enhancing the quality and relevance of the curricula developed by faculty members.
