## Report on "Orientation to Ubiquare clinical platform"

### Event summary:

DATE: 18/08/2022

TIME: 2:00PM

PLACE: College of Physiotherapy, DSU, Kumaraswamy Layout, Bengaluru 560111

Patients with chronic illness, during the course of treatment undergo numerous physical and psychological issues which if taken care can have huge impact on the treatment outcomes. 50M number of patients across India misses out on the clinical follow up care due to the inability to travel to meet the treating specialist and thereby impacting the treatment outcomes and quality of life. Ubiquare Health Pvt Ltd, one of the startup companies, being incubated at ERBI foundation, has come up with an android application that combines tele-health technology, collaborative workflows, and distributed team. The Specialist determines the Care Protocol for each patient, Ubiquare's Care Physician/ Nurse Supervisor to follow virtually the protocol and support the specialists. Visiting last mile Nurse/ Medic to administer the care and report back condition to care physician/ specialist. Identified patients in need of Palliative/ Supportive/ Rehabilitative care post their initial assessment and discharge will continue to get supportive care through the platform and collaborative eco system. Patients in need of supportive care would reach out to the NGO/ Non-Profit Organization or the Multispecialty Hospital or approach Ubiquare directly. They will be connected to the care physician/ Supervisory Nurse/ Medic at Ubiquare. The doctor/ nurse supervisor from Ubiquare will act under the guidance and supervision of the Specialist and provide the needed intervention to patient

Patients can also reach out to the doctor/ Nurse Supervisor/ Medic at Ubiquare from their homes using the cloud telephony feature of the platform. The Doctor/ Nurse/ Medic can guide the patients or the Care giver over the platform to take appropriate actions. They will also update the clinical notes and observations on the platform.

This would benefit many of the remote patients from travelling to hospital for interventions and relief can be provided at the Center level or at home under guidance of the specialist. This will impact the delivery of healthcare significantly in terms of capacity, quality of care and better resource utilization.

A similar model for catering physiotherapy and rehabilitation services is in the pipeline and the feasibility of its utility has to be evaluated.

Facilitators: Mr. Sridhar Pillalamarri, Co-Founder-CEO, Ubiquare Health & Mr. Sundararajan Srinivasan, Co-Founder- CMD, Ubiquare Health

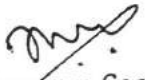

Guest of Honour: Dr. Pushpa Sarkar, Dean, SAHS, DSU

Presence: Dr. Sathya, Principal, COPT, DSU

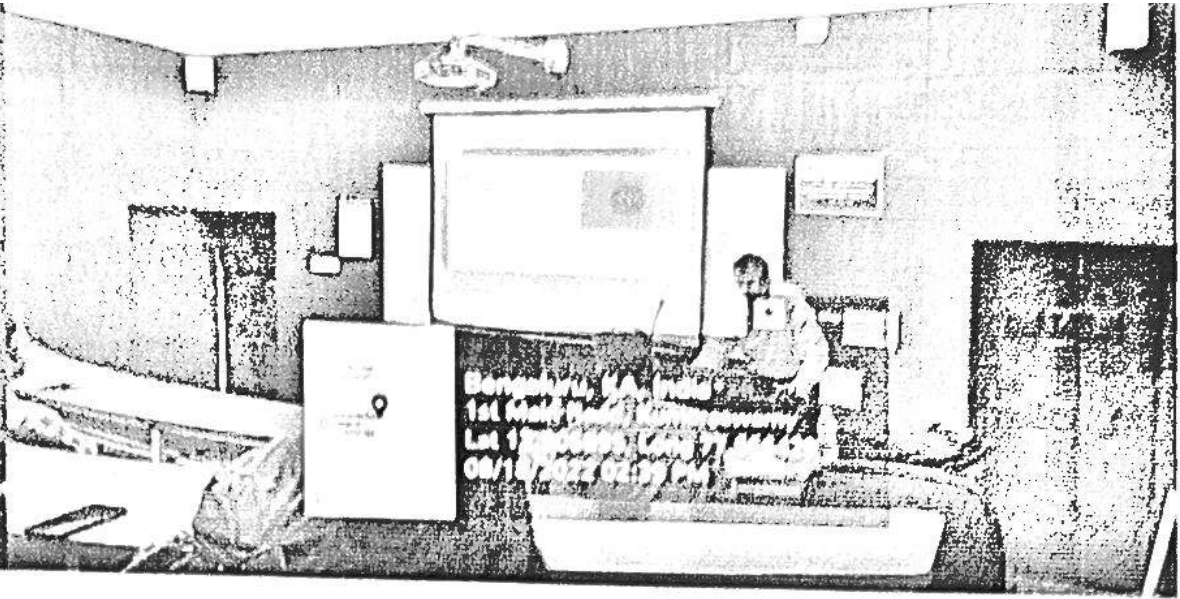

Program coordinator: Dr. Srihari Sharma K N, Associate professor, COPT, DSU.

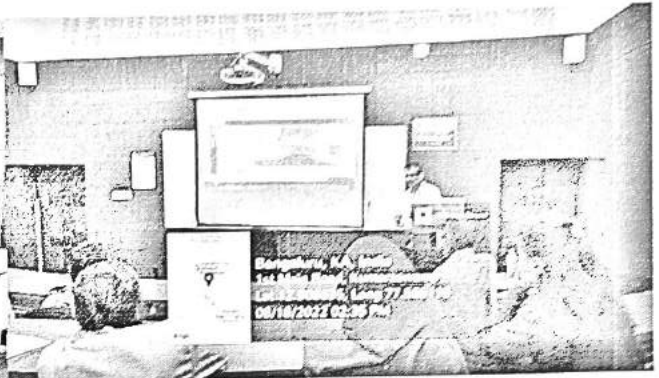

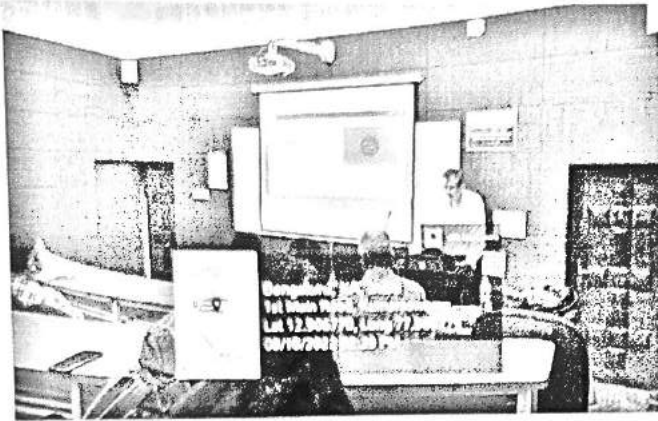

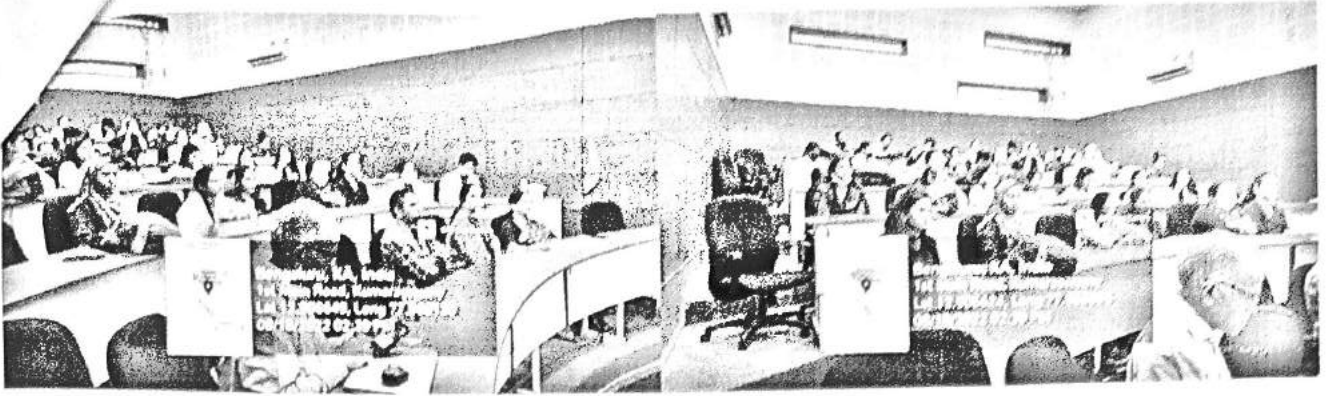

No. of Faculty participated: 12

No. of PG students participated: 30
