FAST LEARNERS AND SLOW LEARNERS – Policy & Guidelines

1.0 Preamble

The School of Engineering (SoE) at Dayananda Sagar University (DSU) strives to improve and increase the learning capacity of students by motivating the faculty to adopt new-age pedagogy focusing on a combination of traditional and modern teaching approaches such as use of audio-visual aids like power point presentations, videos, flipped learning, and so forth, that not only help maintaining the attention span of students but also help in grasping the concept in a better way.

Fast learners (or Advanced learners) are the students who understand concepts relatively faster than the other students in the class and attain high scores. While slow learners on the other hand, mostly they lag behind in their academic pursuit and find it difficult to understand the course. Therefore, we at SoE assess the learning capacity of the students and provide them guidance accordingly.

2.0 Objectives

1. To identify the slow learners and fast learners (or advanced learners) in the class.
2. To develop important strategies that can benefit both the slow and the fast learners.
3. To enhance the confidence of slow learners and help them to enhance their skills in respect of learning processes.
4. To encourage fast learners to make difference in their careers.

3.0 Definitions

- "***Mid-Semester Examination (MSE)"*** refers check to monitor and evaluate students' progress during the course of their learning.
- "***Semester-End Examination (SEE)"*** refers "after the fact," in that they measure how much a student has learned, retained, and mastered after the course of study.

4.0 Identification of Slow and Fast Learners

A. Slow Learners:

- During first semester, Mid-Semester Examination-I (MSE-I) performance is below 50% in three or more courses. While from 2nd semester onwards, students failed in three or more courses in SEE or SGPA is less than or equal to 6 and MSE-I performance is below 50%

- Limited self-direction
- Lagging behind in dealing with higher order problems

B. Fast Learners (or advanced learners):

- Top 10% in the MSE (or test) scores / SGPA / CGPA
- Self-motivated
- High potential to deal with higher order problems

5.0 Strategies for attempting Slow and Fast Learners

A. Slow Learners:

- **Conduction of Remedial classes:**
  - To provide students with the support they need to succeed academically and enhance their learnings and ensure they perform well in the examination.
  - Making the remedial classes effective: Incorporate Peer Tutoring, Frequent Assessments, Use the Best Teaching Strategies, Frequent Feedback, Make Classes Engaging, Parental Involvement, Have realistic goals and holding them accountable for their progress, and Reward Students.
- **Providing extra resources:**
  - Provide online video links of the lectures of faculty members from premier institutes to improve basic understanding of the course.
  - Provide additional study materials, practice papers and question bank in order to boost the confidence among the students.
- **Guidance through mentor-mentee scheme:**
  - Mentoring and connecting with faculty members would set up a healthy relationship between the students and the faculty.
- **Participating in activities to enhance their skills:**
  - Encouraging them to participate in an online platform for technical assessment and remote interview solutions like Hacker Rank, Hacker Erath etc. for self-assessment.
- **Forming Study Groups:** Form study groups of 5 to 7 students comprising a mix of slow and fast learners since students would learn from their colleagues.
- **NOTE:** After the university result declaration of the current semester, faculty shall prepare a report that shows the improvement in performance of slow learners to close the loop.

B. Fast Learners (or Advanced Learners):

- To augment their talent and meet their learning needs.
- To make innovative solutions and develop new solutions based on new technological advances.
- Motivate to participate in various technical events, online courses like Coursera, NPTEL, Value-added course etc. Hence, involving them to carry out online certification programmes.
- Motivate students to participate in Conferences and other National and International competitions.
- Encourage students to make research contributions in their major project at the UG level and publish their results in journals and also present it at National and International Conferences.
- Provide opportunities to participate in Hackathon, Workshops and other events.
- Motivating the students to take up higher studies in premier organizations.
- Provide opportunities to learn and exhibit leadership qualities in various department and university level activities.
- Provide small independent projects or extra homework to earn extra credit including to earn Honors degree.

6.0 Discussions and Conclusions

We believe that this policy may bring positive impact and it is expected for the fast and slow learners that there will be an overall improvement in university results and their future careers. Following documents should be maintained:

- List of slow learners.
- List of fast learners.
- Report of result of continuous internal assessment.
- Report of performance improvement for slow learners.
- Attendance record for session conducted for slow learners.
- List of tasks given to fast learners.

The Advanced learners from the department of Aerospace Engineering who are pursuing IV semester (2022-2026) where given an opportunity to participate in multiple activities apart from academics

Overview of Space Science and Technology

Advanced learners have been inspired to participate in the online training program "Overview of Space Science and Technology," conducted by the Indian Institute of Remote Sensing from July 20, 2023, to August 7, 2023. A total of 15 students from VII semester participated in the program and a sample certificate is provided herewith. This comprehensive 22-hour program provided in-depth insights into the fundamentals and advancements in space science and technology. The program aimed to enhance understanding and promote interest in this cutting-edge field, offering participants a valuable opportunity to expand their knowledge and skills.

Rotorcraft 2024

The student showcased exceptional enthusiasm and skill by participating in *RotorCraft 2024*, a National Level Multirotor Competition organized by the NMAM Institute of Technology, Nitte. Deeksha shetty identified as an advanced learner as per DSU, SOE policy participated in the event. The event, held under the aegis of SAEINDIA Aerospace Forum and supported by esteemed organizations like Tata Advanced Systems, provided a platform for aspiring engineers to demonstrate their expertise in multirotor technology. This prestigious competition fostered innovation, teamwork, and hands-on learning, enabling participants to explore the latest advancements in aerospace engineering.

The Objectives of the Challenge

- To provide a standardised platform for exploring the area of space robotics
- To develop a deeper understanding of space robotics and its applications among the student community. It enhances their communication, collaboration, inquiry, problem solving and flexibility skills that will benefit them in their academic and professional lives.
- To co-develop (students and ISRO) future technologies needed in the area of space robotics.

Outcome for Student Community

NANDI FILE NANDI FILE NANDI FILE NANDI FILE NANDI FILE NANDI FILE NANDI FILE NANDI FILE

- Identify, formulate, and solve complex engineering problems by applying principles of mathematics, science and engineering
- Apply engineering design to produce solutions that meet specified needs
- Communicate effectively
- Collaborate with a team, provide inclusive leadership, establish goals, plan tasks, and meet objectives
- Formulate and conduct appropriate experiments, analyse and interpret test and analytical data and use engineering judgment to draw conclusions

The Advanced learners' details are mentioned below:

- **Name & USN of the Student: Khyathi Choubey (ENG22AS0030), Sri Laxmi Shenoy (ENG22AS0041)**
- The students actively participated in this activity and got an opportunity to develop a rover under the guide of the department faculties.

Actions taken For Slow Learners

Course & Course Code: Fluid Mechanics (22AS2304)

- The students were provided with simplified notes on the Fluid mechanic's course
- The Numerical part of few modules was solved in the class again and the students were asked to practice the numerical
- The students were asked to write repeatedly on taught topics

Course & Course Code: Aerospace Materials (22AS2306)

Actions taken For Slow Learners

- The students were provided with web links for the clear understanding of the concepts
- The students were given the techniques and tricks to improve their comprehension as the course is a theory a lot of Remembering and Memorization was required.

Course & Course Code: Introduction to Computational Fluid Dynamics (22AS2406)

Actions taken For Slow Learners

- The students were provided with few animation videos to understand the flow methods and the concepts related to CFD.
- The students were taught with basic maths and few topics were revised and retaught.

Fluid Mechanics (22AS2304)

Remedial Class Numericals and Solutions

Example 1:

A flat plate of area 1.5 × 10⁶ mm² is pulled with a speed of 0.4 m/s relative to another plate located at a distance of 0.15 mm from it. Find the force and power required to maintain this speed, if the fluid separating them is having viscosity as 1 poise.

Given

Area of the plate, $A = 1.5 \times 10^6 \text{ mm}^2 = 1.5 \text{ m}^2$

Speed of plate relative to another plate, $du = 0.4$ m/s

Distance between the plates, $dy = 0.15 \text{ mm} = 0.15 \times 10^{-3}$ m

Viscosity $\mu = 1 \text{ poise} = \frac{1}{10} \frac{\text{Ns}}{\text{m}^2}$.

Using equation (1.2) we have $\tau = \mu \frac{du}{dy} = \frac{1}{10} \times \frac{0.4}{.15 \times 10^{-3}} = 266.66 \frac{\text{N}}{\text{m}^2}$

(i) Shear force, $F = \tau \times \text{area} = 266.66 \times 1.5 = \mathbf{400\ N.}$ **Ans.**

(ii) Power required to move the plate at the speed 0.4 m/sec

$= F \times u = 400 \times 0.4 = \mathbf{160\ W.}$ **Ans.**

Example 2:

Find the kinematic viscosity of an oil having density 981 kg/m³. The shear stress at a point in oil is 0.2452 N/m² and velocity gradient at that point is 0.2 per second.

Solution. Given :

Mass density, $\rho = 981 \text{ kg/m}^3$

Shear stress, $\tau = 0.2452 \text{ N/m}^2$

Velocity gradient, $\frac{du}{dy} = 0.2 \text{ s}$

Using the equation (1.2), $\tau = \mu \frac{du}{dy}$ or $0.2452 = \mu \times 0.2$

$\therefore \quad \mu = \frac{0.2452}{0.200} = 1.226 \text{ Ns/m}^2$

Kinematic viscosity ν is given by

$\therefore \quad \nu = \frac{\mu}{\rho} = \frac{1.226}{981} = 125 \times 10^{-6} \text{ m}^2/\text{sec}$

$= 0.125 \times 10^{-3} \times 10^4 \text{ cm}^2/\text{s} = 0.125 \times 10^1 \text{ cm}^2/\text{s}$

$= 12.5 \text{ cm}^2/\text{s} = \mathbf{12.5\ stoke.}$ **Ans.**

($1 \text{ cm}^2/\text{s} = 1 \text{ stoke}$)

Example 3:

The dynamic viscosity of an oil, used for lubrication between a shaft and sleeve is 6 poise. The shaft is of diameter 0.4 m and rotates at 190 r.p.m. Calculate the power lost in the bearing for a sleeve length of 90 mm. The thickness of the oil film is 1.5 mm.

Solution. Given :

Viscosity $\mu = 6$ poise

$$= \frac{6 \text{ N s}}{10 \text{ m}^2} = 0.6 \frac{\text{N s}}{\text{m}^2}$$

Dia. of shaft, $D = 0.4$ m

Speed of shaft, $N = 190$ r.p.m

Sleeve length, $L = 90 \text{ mm} = 90 \times 10^{-3}$ m

Thickness of oil film, $t = 1.5 \text{ mm} = 1.5 \times 10^{-3}$ m

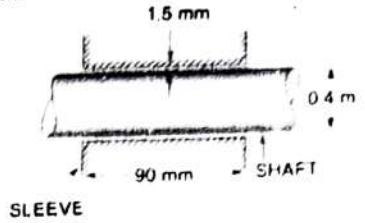

Fig. 1.5

Tangential velocity of shaft, $u = \frac{\pi D N}{60} = \frac{\pi \times 0.4 \times 190}{60} = 3.98$ m/s

Using the relation $\tau = \mu \frac{du}{dy}$

where du = Change of velocity = $u - 0 = u = 3.98$ m/s

dy = Change of distance = $t = 1.5 \times 10^{-3}$ m

$$\tau = 10 \times \frac{3.98}{1.5 \times 10^{-3}} = 1592 \text{ N/m}^2$$

Example 4:

Find out the minimum size of glass tube that can be used to measure water level if the capillary rise in the tube is to be restricted to 2 mm. Consider surface tension of water in contact with air as 0.073575 N/m.

Solution. Given :

Capillary rise, $h = 2.0 \text{ mm} = 2.0 \times 10^{-3}$ m

Surface tension, $\sigma = 0.073575$ N/m

Let dia. of tube $= d$

The angle θ for water $= 0^\circ$

The density for water, $\rho = 1000$ kg/m^3

Using equation (1.20), we get

$$h = \frac{4\sigma}{\rho \times g \times d} \text{ or } 2.0 \times 10^{-3} = \frac{4 \times 0.073575}{1000 \times 9.81 \times d}$$

$$\therefore \quad d = \frac{4 \times 0.073575}{1000 \times 9.81 \times 2 \times 10^{-3}} = 0.015 \text{ m} = 1.5 \text{ cm. Ans.}$$

Thus minimum diameter of the tube should be 1.5 cm.

dy = Change of distance = $t = 1.5 \times 10^{-3}$ m

$$\tau = 10 \times \frac{3.98}{1.5 \times 10^{-3}} = 1592 \text{ N/m}^2$$

Example 5:

The diameters of a pipe at the sections 1 and 2 are 10 cm and 15 cm respectively. Find the discharge through the pipe if the velocity of water flowing through the pipe at section 1 is 5 m/s. Determine also the velocity at section 2.

Solution Given :

At section 1, $D_1 = 10 \text{ cm} = 0.1 \text{ m}$

$$A_1 = \frac{\pi}{4}(D_1^2) = \frac{\pi}{4}(.1)^2 = 0.007854 \text{ m}^2$$

$V_1 = 5$ m/s.

At section 2, $D_2 = 15 \text{ cm} = 0.15 \text{ m}$

$$A_2 = \frac{\pi}{4}(.15)^2 = 0.01767 \text{ m}^2$$

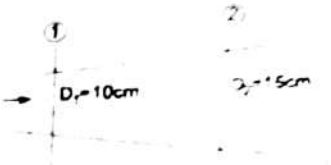

Fig. 5.2

(i) Discharge through pipe is given by equation (5.1)

$$Q = A_1 \times V_1$$

$$= 0.007854 \times 5 = \mathbf{0.03927 \text{ m}^3/\text{s}}. \text{ Ans.}$$

Using equation (5.3), we have $A_1V_1 = A_2V_2$

(ii) $V_2 = \frac{A_1V_1}{A_2} = \frac{0.007854}{0.01767} \times 5.0 = \mathbf{2.22 \text{ m/s}}. \text{ Ans.}$

$p_1 = s \times h_1$

$= (1.53 \times 1000) \times 9.81 \times 3 = 45028 \text{ N/m}^2$

$\therefore$ Gauge pressure, $p = \mathbf{45028 \text{ N/m}^2}. \text{ Ans.}$

Now absolute pressure = Gauge pressure + Atmospheric pressure

$= 45028 + 100062 = \mathbf{145090 \text{ N/m}^2}. \text{ Ans.}$

Consolidated report on special programs for slow performers and advanced learners:

Proforma for identification of slow performers and advanced learners:

Students fulfilling the attendance requirement and scoring less than 50% marks in theory and practical tests combined and those securing <40% in theory or practical tests considered separately in the first internal assessment examination or an examination for the purpose for a course are categorized as slow learners.

Students fulfilling the attendance requirement and scoring more than 75% marks in the first internal assessment examination or an examination for the purpose for a course are categorized as advanced learners.

Special programs for slow performers:

1. Remedial classes: are held for reinforcing the difficult concepts.

2. Remedial tests: are conducted for providing more opportunities for improvement including tutorials.

3. Language classes: vernacular language (Kannada) classes are held for bridging communication gaps for out of the state students.

4. Interactive teaching: Interactive lectures and small group discussions are incorporated in the curriculum to make learning more active.

5. Case based teaching: Clinical case scenarios are incorporated in teaching methods to simulate real life situations for problem solving that make learning more interesting.

6. Regular mentorship: helps the slow learners to closely interact with teachers and discuss various issues that may affect learning process.

7. Activity based learning: like preparation of charts, models that help the slow learners to be more practical in their approach.

8. Use of skill lab: for demonstrations and hands on training on mannequins encourages experiential learning.

Special programs for advanced learners:

1. Participation in seminars, symposia, poster presentations help advanced learners to exhibit their skills.

2. Participation in various competitions both at intra and inter-college levels aid in rewarding the top achievers.

3. Participation in research activities like ICMR-STS and other projects facilitates budding researchers among the advanced learners.

4. Advanced skill lab facility encourages the advanced learners to fine tune their skills before embarking on real life roles and responsibilities.

Details of outcome measures for slow performers and advanced learners:

Progress of slow performers is measured after remedial classes and continuous re-assessments till the target scores are achieved. Achievements of advanced learners are suitably rewarded.

Q.1 What do you understand from the term "Health Indicators"? What are the characteristics of ideal indicators? Describe the different "Disability rates". [2+3+5]

Indicators are an indication of a given situation or a reflection of that situation. In WHO's guidelines for health programme evaluation they are defined as variables which help to measure changes. If measured sequentially over time, they can indicate direction and speed of change and serve to compare different areas or groups of people at the same moment in time.

Indicators are required to measure the health status of a community, to compare the health status of one country with that of another; for assessment of health care needs; for allocation of scarce resources; and for monitoring and evaluation of health services, activities, and programmes. Indicators help to measure the extent to which the objectives and targets of a programme are being attained.

Characteristics of indicators

22/11/25
Dr. Chandramma Dayananda Sagar
Institute of Medical Education & Research

Indicators have been given scientific respectability; for example ideal indicators

a. should be valid, i.e., they should actually measure what they are supposed to measure;

b. should be reliable and objective, i.e., the answers should be the same if measured by different people in similar circumstances;

c. should be sensitive, i.e., they should be sensitive to changes in the situation concerned,

d. should be specific, i.e., they should reflect changes only in the situation concerned,

e. should be feasible, i.e., they should have the ability to obtain data needed, and;

f. should be relevant, i.e., they should contribute to the understanding of the phenomenon of interest.

Disability rates

The disability rates are based on the premise or notion that health implies a full range of daily activities. The commonly used disability rates fall into two groups: (a) Event-type indicators and (b) person-type indicators

(a) Event-type indicators

i) Number of days of restricted activity

ii) Bed disability days

iii) Work-loss days (or school-loss days) within a specified period

(b) Person-type indicators

i) Limitation of mobility: For example, confined to bed, confined to the house, special aid in getting around either inside or outside the house.

ii) Limitation of activity: For example, limitation to perform the basic activities of daily living (ADL)- e.g., eating, washing, dressing, going to toilet, moving about, etc; limitation in major activity, e.g., ability to work at a job, ability to housework, etc.

HALE (Health-Adjusted Life Expectancy): HALE is based on life expectancy at birth but includes an adjustment for time spent in poor health. It is most easily understood as the equivalent number of years in full health that a newborn can expect to live based on current rates of ill-health and mortality.

Quality-adjusted life years (QALY): QALY is a measure of disease burden including both the quality and quantity of life lived. It is used in assessing the value for money of a medical intervention. The QALY is based on the number of years of life that would be added by intervention

Each year in perfect health is assigned a value of 1.0 down to a value of 0.0 for death, i.e. 1 QALY (1 year of life x 1 utility value = 1 QALY) is a year of life lived in perfect health. Half a year lived in perfect health is equivalent to 0.5 QALY (1 year x 0.5 utility value).

Disability-free life expectancy (Syn: active life expectancy): Disability-free life expectancy (DFLE) is the average number of years an individual is expected to live free of disability if current pattern of mortality and disability continue to apply.

Disability-adjusted life years (DALY): DALY is a measure of overall disease burden, expressed as a number of years lost due to ill-health, disability or early death. The DALY is becoming increasingly common in the field of public health and health impact assessment. The Global Burden of Disease project combines the impact of premature mortality with that of disability.

The major measure used is disability-adjusted life years (DALYs) combines:

Years of lost life (YLL) - calculated from the number of deaths at each age multiplied by the expected remaining years of life according to a global standard life expectancy

Years lost to disability (YLD) where the number of incident cases due to injury and illness is multiplied by the average duration of the disease and a weighting factor reflecting the severity of the disease on a scale from 0 (perfect health) to 1 (dead).

It is calculated by formula: DALY = YLL + YLD

The DALY relies on an acceptance that the most appropriate measure of the effects of the chronic illness is time. One DALY, therefore, is equal to one year of healthy life lost.

A crucial distinction among DALY studies is the use of "social weighting", in which the value of each year of life depends on age. Commonly, years lived as a young adult are valued more highly than years spent as a young child or older adults. This weighting system reflects society's interest in productivity and receiving a return on its investment in upbringing of the children.

III. Short Essay

Q.2 Write in brief about the diagnosis and prevention and control of Lead poisoning?

More industrial workers are exposed to lead than to any other toxic metal. Lead is used widely in a variety of industries like manufacture of storage batteries; glass manufacture; ship building; printing and potteries; rubber industry and several others.

DIAGNOSIS:

Diagnosis of lead poisoning is based on:

(1) HISTORY: a history of lead exposure

(2) CLINICAL FEATURES: such as loss of appetite, intestinal colic, persistent headache, weakness, abdominal cramps and constipation, joint and muscular pains, blue line on gums, anaemia, etc.

(3) LABORATORY TESTS:

(a) Coproporphyrin in urine (CPU): Measurement of CPU is a useful screening test. In non-exposed persons, it is less than 150 microgram/litre.

(b) Amino levulinic acid in urine (ALAU): If it exceeds 5 mg/ litre, it indicates clearly lead absorption.

(c) Lead in blood and urine: Measurement of lead in blood or urine requires refined laboratory techniques. Lead in urine of over 0.8 mg/litre (normal is 0.2 to 0.8 mg) indicates lead exposure and lead absorption. A blood level of 70µg/100 ml is associated with clinical symptoms.

(d) Basophilic stipling of RBC: Is a sensitive parameter of the haematological response.

PREVENTIVE MEASURES

(1) Substitution: That is, where possible lead compounds should be substituted by less toxic materials.

(2) Isolation: All processes which give rise to harmful concentration of lead dust or fumes should be enclosed and segregated.

(3) Local exhaust ventilation: There should be adequate local exhaust ventilation system to remove fumes and dust promptly

(4) Personal protection: Workers should be protected by approved respirators.

(5) Good house-keeping: Good house-keeping is essential where lead dust is present. Floors, benches, machines should be kept clean by wet sweeping.

(6) Working atmosphere: Lead concentration in the working atmosphere should be kept below 2.0 mg per 10 cu. metres of air, which is usually the permissible limit or threshold value.

(7) Periodic examination of workers: All workers must be given periodical medical examination. Laboratory determination of urinary lead, blood lead, red cell count, haemoglobin estimation and coproporphyrin test of urine should be done periodically.

(8) Personal hygiene: Hand- washing before eating is an important measure of personal hygiene. There should be adequate washing facilities in industry. Prohibition on taking food in work places is essential.

(9) Health education: Workers should be educated on the risks involved and personal protection measures.

MANAGEMENT :

The major objectives in management of lead poisoning are the prevention of further absorption, the removal of lead from soft tissues and prevention of recurrence. A saline purge will remove unabsorbed lead from the gut. The use of D-penicillamine has been reported to be effective. Like Ca-EDTA, it is a chelating agent and works by promoting lead excretion in urine. Lead poisoning is a notifiable and compensatable disease in India since 1924

Q.3 Discuss about Man-made disasters and its preventive measures

There are many disasters which have large elements of human causation either accidental or intended.

These can also be divided into three categories.

(a) Sudden disasters such as **Bhopal Gas Tragedy in India on 3rd December 1984** in which a leakage in the storage tank of Union Carbide Pesticide Plant released tons of methyl isocyanate into the air. Wind conditions and an atmospheric inversion, along with delayed warning and a population that had not been taught the nature of risks and the appropriate response increased the impact. People are still suffering from the adverse effects of the gas. The second example is the accident at reactor 4 of the **Chernobyl nuclear power station in the Soviet Union on April 26, 1986,** which resulted in the largest reported accidental release of radioactive material in the history of nuclear power.

(b) Insidious disasters, such as insidious chemical exposure and insidious radiation exposure, as in nuclear weapons production factories, research laboratories resulting in release of radioactive substances into the air, soil and underground water. Chemical plants releasing their toxic by-products into rivers and other water sources is another example. Other form of long term and continuing human-made disaster include global warming (the "green house effect") caused by the heat-trapping gases in the atmosphere released by burning of fossil fuels, and depletion of ozone layer due to the use of the aerosolized chlorofluorohydrocarbons etc.; and

(c) Wars and civil conflicts. The latest example is the attack on twin buildings of World Trade Centre in New York in which about 6000 people lost their lives and thousands were injured.

Air-borne power and wide-ranging nature of modern war puts an entire population at risk, disrupting food production and supply routes, imperiling fragile ecosystem and forcing refugees by hundred of thousands to flee. More than half of the civilian deaths in current hostilities resulted from war-related famines. However, civil wars, representing power conflicts within nations, have increased sharply in the twentieth century, and are now, by far the major form of warfare.

Preventive measures:

1. Tighter regulations of chemical plants and other hazardous facilities and insistence that the chemical plants be built away from dense populous areas.

2. Other measures include appropriate engineering and technological measures (like building codes, dam designs, containment of toxic materials), early warning, if possible, and protection against human errors.

3. To develop civil defence programmes.

Q.4 Describe the categorization of Adverse Events Following Immunization

1. Vaccine product-related reaction

An AEFI that is caused or precipitated by a vaccine due to one or more of the inherent properties of the vaccine product

Example: Extensive limb swelling following DTP vaccination.

2. Vaccine quality defect-related reaction

An AEFI that is caused or precipitated by a vaccine that is due to one or more quality defects of the vaccine product, including its administration device as provided by the manufacturer.

Example: Failure by the manufacturer to completely inactivate a lot of inactivated polio vaccine leads to cases of paralytic polio.

3. Immunization error-related reaction

An AEFI that is caused by inappropriate vaccine handling, prescribing or administration and thus by its nature is preventable.

Example: Transmission of infection by contaminated multidose vial.

4. Immunization anxiety-related reaction

An AEFI arising from anxiety about the immunization

Example: Vasovagal syncope in an adolescent during/ following vaccination.

5. Coincidental event

An AEFI that is caused by something other than the vaccine product, immunization error or immunization anxiety

Example: A fever occurs at the time of the vaccination (temporal association) but is in fact caused by malaria.

IV. Short answer

Q.5 Enumerate the services provided by the anganwadi worker.

The anganwadi worker is selected from the community she is expected to serve. The services rendered, include

Health check-up including maintenance of growth chart,

Immunization,

Supplementary nutrition,

Health education,

Non-formal pre-school education and

Referral services

Q.6 Write six warning signs of poor mental health

Warning signals of poor mental health

William C. Menninger, President of the Menninger Foundation, Topeka, Kansas, United States of America drew up the following questions to aid in taking one's own mental health pulse:

1. Are you always worrying?

2. Are you unable to concentrate because of unrecognized reasons?

3. Are you continually unhappy without justified cause?

4. Do you lose your temper easily and often?

5. Are you troubled by regular insomnia?

6. Do you have wide fluctuations in your moods from depression to elation, back to depression, which incapacitate you?

7. Do you continually dislike to be with people?

8. Are you upset if the routine of your life is disturbed?

9. Do your children consistently get on your nerves?

10. Are you "browned off" and constantly bitter?

11. Are you afraid without real cause?

12. Are you always right and the other person always wrong?

13. Do you have numerous aches and pains for which no

Q.7 What is web of causation model?

The "web of causation" model is ideally suited in the study of chronic disease, where the disease agent is often not known, but is the outcome of interaction of multiple factors.

The web of causation does not imply that the disease cannot be controlled unless all the multiple causes or chains of causation or at least a number of them are appropriately controlled or removed. Sometimes removal or elimination of just only one link or chain may be sufficient to control disease, provided that link is sufficiently important in the pathogenetic process.

Q.8 Define Carriers in disease transmission. Write the classification of carriers.

A carrier is defined as "an infected person or animal that harbours a specific infectious agent in the absence of discernible clinical disease and serves as a potential source of infection for others"

Carriers may be classified as below:

A. Type

(a) Incubatory

(b) Convalescent

(c) Healthy

B. Duration

(a) Temporary

(b) Chronic

C. Portal of exit

(a) Urinary

(b) Intestinal

(c) Respiratory

Q. 9 Enumerate any six essential components of primary health care

1. Education concerning prevailing health problems and the methods of preventing and controlling them;

2. Promotion of food supply and proper nutrition;

3. An adequate supply of safe water and basic sanitation;

4. Maternal and child health care, including family planning;

5. Immunization against major infectious diseases;

6. Prevention and control of locally endemic diseases;

7. Appropriate treatment of common diseases and injuries; and

8. Provision of essential drugs.

Consolidated report on special programs for slow performers and advanced learners:

Proforma for identification of slow performers and advanced learners:

Students fulfilling the attendance requirement and scoring less than 50% marks in theory and practical tests combined and those securing <40% in theory or practical tests considered separately in the first internal assessment examination or an examination for the purpose for a course are categorized as slow learners.

Students fulfilling the attendance requirement and scoring more than 75% marks in the first internal assessment examination or an examination for the purpose for a course are categorized as advanced learners.

Special programs for slow performers:

1. Remedial classes: are held for reinforcing the difficult concepts.

2. Remedial tests: are conducted for providing more opportunities for improvement including tutorials.

3. Language classes: vernacular language (Kannada) classes are held for bridging communication gaps for out of the state students.

4. Interactive teaching: Interactive lectures and small group discussions are incorporated in the curriculum to make learning more active.

5. Case based teaching: Clinical case scenarios are incorporated in teaching methods to simulate real life situations for problem solving that make learning more interesting.

6. Regular mentorship: helps the slow learners to closely interact with teachers and discuss various issues that may affect learning process.

7. Activity based learning: like preparation of charts, models that help the slow learners to be more practical in their approach.

8. Use of skill lab: for demonstrations and hands on training on mannequins encourages experiential learning.

2.2.1 The institution assesses the learning levels of the students and organizes special Programs for advanced learners and slow learners

The college has a strong mentoring and counselling programme in place. Students are paired with a particular faculty member who serve as their mentors and counsellors through-out their tenure in the college. The mentors meet with their student mentees on a regular basis to check on their progress in the classroom, and any other counselling they might require.

As a standard protocol, a student scoring less than 40% marks in three or more internal topics and having less than 75% attendance is regarded as a student who learns slowly in school. These students are closely monitored by counsellors, who counsel them regularly and let their parents know their performance. Remedial and extra classes are arranged for such students. They are given special attention and all efforts are made to enhance their learning and results.

The students achieve more than 80% scores are considered as advanced learners. They are encouraged to appear for higher education and write various competitive exams like GPAT, GRE etc based on their aptitude. Appropriate guidance and counselling is down for these students.

The students who are doing well in studies are also encouraged to participate in various projects, conferences, make them part of on-going research projects with relevant faculty. They are invigorated to participate in various competitions, national and international events to further expose them to the current scenario and find their true liking and potential.

We try to pair slow learners with advance learners for their symbiotic learning and growth.

In the last year of the program the students are counselled for their jobs prospects or directed towards higher studies depending on their aptitude. Appropriate help is also extended like advice for colleges, course selection, job selection etc. Ten students of 8th Sem B Pharm and one student of 6th Sem B Pharm have cleared GPAT exam.

Revision Class Circular
3rd sem B Pharm

Revision classes will be conducted for the students identified based on academic performance (test and internal marks). The revision classes will primarily focus on core subjects where students may require extra guidance.

Regular assessments will be an integral part of the revision classes to monitor progress and tailor the learning experience to individual needs. Students who are **having lack of attendance** can also attend the revision classes to improve their attendance.

Students will be given questions during each revision session from the concerned subject teacher, for which they must prepare using the study materials and submit the same between **4 and 5 p.m.** Attendance is mandatory for all the identified students and the same will be maintained in a separate register.

Students are expected to arrive on time and stay for the entire duration of the class.

Q Explain the ph colegy of antibiotic

Aminoglycoside
Tetracycline

Classification M.O.A ph kinetic, uses, Adverse effect

21/10/23

① Aminoglycoside:

classification :-

Amino glycoside are a class of bacterial antibiotic primarily effective against gram-ve bacteria

Systemic aminoglycoside	Topical Amino
- Streptomycin	- Neomycin
- Gintamycin	- Framycitin
- Kanamycin	
- Amikacin	

MOA :- Aminoglycoside provides bacterial protein synthesis by binding directly to the 30's ribosomal subunit. leading to misreading of the MRNA ultimately causing inhibition of protein synthesis.

gram (+ve) & (-ve) organism as well as typical pathogens like - chlamydia.

Tetracycline.

A Short acting (6 - 8 hr)

Long acting (t½ - 16 hr).

Intermediate acting (t½ - 12 hr)

Uses - Mycoplasmal pneumonia.

Whooping cough

Chancroid.

Syphilis.

Adv effect - Nausea

Vomiting.

Pharmacology

19/9/23

Define Asthama ? and write the drugs used in treatmen of Asthama with classification. + pharmacology of salbutamol.

* Asthma is more common respiratory tract infection.
* It is chronic disease in which the bronchial airway in the lungs become narrowed and swollen, making difficult to breath..

10 Marks

Classification

1. Bronchodilator
   - β_2 sympathomimetics - salbutamol
   - methyl xanthine - thiophylline.
   - Anticholinergic - Tpotropium bromide.
2. leukotriene antagonist - montelukast
3. mast cell stabilizers - Nedocromil
4. corticosteroids - systemic - prednisolone.
   Inhalation - propionate
5. Anti IgE antibody - Omalizumab.

Salbutamol

* Bronchodilators.
* Binds to β receptor.
* Stimulate adenyl cyclase activity
* cause ↑ in cAMP which leads to smooth muscle relaxation..

College of Pharmaceutical Sciences
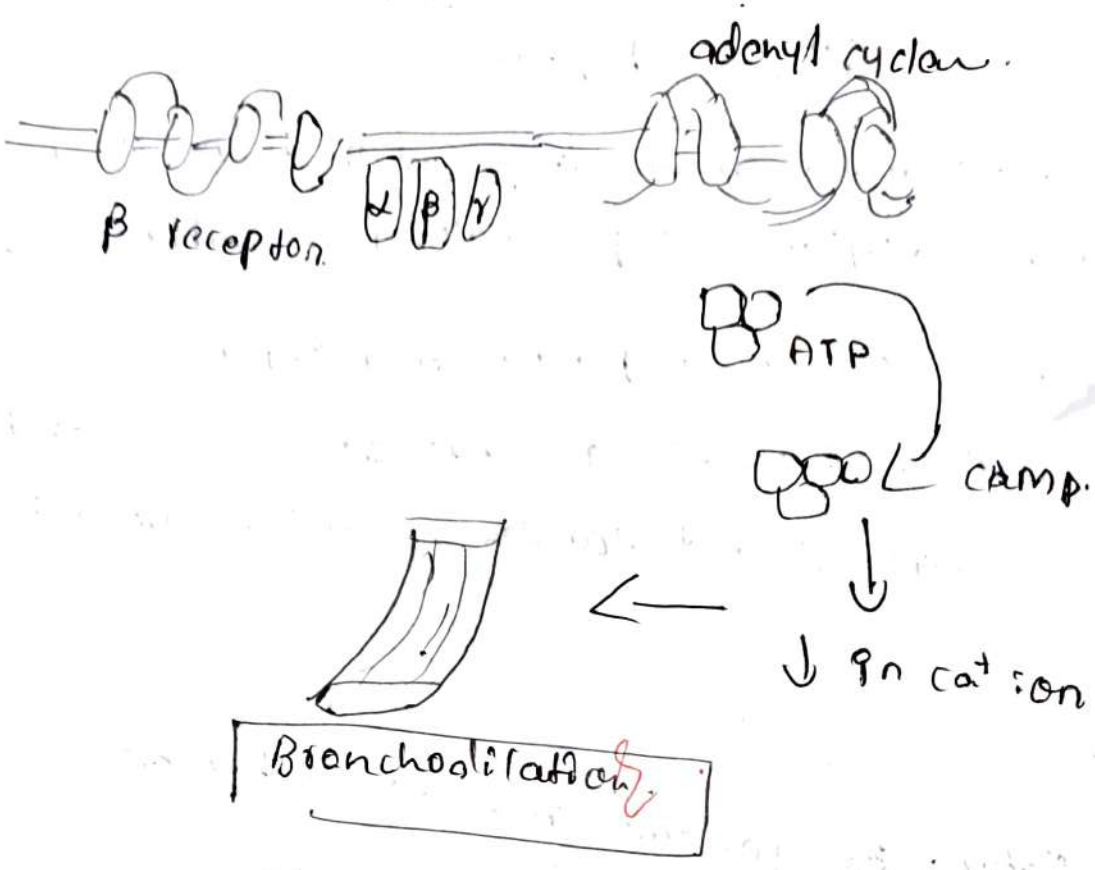
Dayananda Sagar University
Kumaraswamy Layout,
Bengaluru - 560 078.



Pharmacokinetics

* Systemic absorption will be rapid
* Salbutamol is excreted in the urine as free drug
* Oral administration 58 - 78 % of dose excreated. in orine in 24 hours
* half life 2.7 to 5 hours.

Uses

* used in treatment of asthama.
* In treatment of COPD.
* In treatment of bronchospasm.

In acute hyperkalemia

Adverse effect

Inhalation on the form of aerosols - cause palpitations

Anxiety. &

tremors (less then 15% patient. (common on syrup & tablet.

Contraindication

* not safe during pregnancy

* hypersensitivity reaction.

2.2.1 The institution assesses the learning levels of the students and organizes special Programs for advanced learners and slow learners

The college has a strong mentoring and counselling programme in place. Students are paired with a particular faculty member who serve as their mentors and counsellors through-out their tenure in the college. The mentors meet with their student mentees on a regular basis to check on their progress in the classroom, and any other counselling they might require.

As a standard protocol, a student scoring less than 40% marks in three or more internal topics and having less than 75% attendance is regarded as a student who learns slowly in school. These students are closely monitored by counsellors, who counsel them regularly and let their parents know their performance. Remedial and extra classes are arranged for such students. They are given special attention and all efforts are made to enhance their learning and results.

The students achieve more than 80% scores are considered as advanced learners. They are encouraged to appear for higher education and write various competitive exams like GPAT, GRE etc based on their aptitude. Appropriate guidance and counselling is down for these students.

The students who are doing well in studies are also encouraged to participate in various projects, conferences, make them part of on-going research projects with relevant faculty. They are invigorated to participate in various competitions, national and international events to further expose them to the current scenario and find their true liking and potential.

We try to pair slow learners with advance learners for their symbiotic learning and growth.

In the last year of the program the students are counselled for their jobs prospects or directed towards higher studies depending on their aptitude. Appropriate help is also extended like advice for colleges, course selection, job selection etc. Ten students of 8th Sem B Pharm and one student of 6th Sem B Pharm have cleared GPAT exam.

Revision Class Circular
3rd sem B Pharm

Revision classes will be conducted for the students identified based on academic performance (test and internal marks). The revision classes will primarily focus on core subjects where students may require extra guidance.

Regular assessments will be an integral part of the revision classes to monitor progress and tailor the learning experience to individual needs. Students who are **having lack of attendance** can also attend the revision classes to improve their attendance.

Students will be given questions during each revision session from the concerned subject teacher, for which they must prepare using the study materials and submit the same between **4 and 5 p.m.** Attendance is mandatory for all the identified students and the same will be maintained in a separate register.

Students are expected to arrive on time and stay for the entire duration of the class.

Q Explain the ph colegy of antibiotic

Aminoglycoside
Tetracycline

Classification M.O.A ph kinetic, uses, Adverse effect

21/10/23

① Aminoglycoside:

classification :-

Amino glycoside are a class of bacterial antibiotic primarily effective against gram-ve bacteria

Systemic aminoglycoside	Topical Amino
- Streptomycin	- Neomycin
- Gintamycin	- Framycitin
- Kanamycin	
- Amikacin	

MOA :- Aminoglycoside provides bacterial protein synthesis by binding directly to the 30's ribosomal subunit. leading to misreading of the MRNA ultimately causing inhibition of protein synthesis.

Define Asthama ? and write the drugs used in treatmen of Asthama with classification. + pharmacology of salbutamol.

* Asthma is more common respiratory tract infection.
* It is chronic disease in which the bronchial airway in the lungs become narrowed and swollen, making difficult to breath..

10 Marks

Classification

1. Bronchodilator
   - β_2 sympathomimetics - salbutamol
   - methyl xanthine - thiophylline.
   - Anticholinergic - Tpotropium bromide.
2. leukotriene antagonist - montelukast
3. mast cell stabilizers - Nedocromil
4. corticosteroids - systemic - prednisolone.
   Inhalation - propionate
5. Anti IgE antibody - Omalizumab.

Salbutamol

* Bronchodilators.
* Binds to β receptor.
* Stimulate adenyl cyclase activity
* cause ↑ in cAMP which leads to smooth muscle relaxation..

Pharmacokinetics

* Systemic absorption will be rapid
* Salbutamol is excreted in the urine as free drug
* Oral administration 58 - 78 % of dose excreated. in orine in 24 hours
* half life 2.7 to 5 hours.

Uses

* used in treatment of asthama.
* In treatment of COPD.
* In treatment of bronchospasm.

In acute hyperkalemia

Adverse effect

Inhalation on the form of aerosols - cause palpitations

Anxiety. &

1. Pest and Pest management in medicinal plants

Pest is any animal, plant (or) microorganism that cause trouble, injuries (or) destruction to plants (or) crops

Methods of Pest management:

- Natural Control
- Artificial Control

→ Natural Control

Topographical influence of the seasons changes, changing temperature rainfall, soil atomosphere, humidity and other natural factors also shows their effect on insects and their host

→ Artificial Control

The Control of pest have been developed by man

Classification of Pesticides

-> Insecticides
-> Herbicides
-> fungicides

Advantages

- they are cheap
- they are less harmfull to the human being and more effective against pest
- they are more stable and can be kept for prolonged period
- they can be used to control the carrier of vector borne disease like, malarial, sleeping sickness & dague fever

Disadvantages

- the onset of action is slow
- the quantity of pesticides required may be more due to crude components

Size and Composition of Pharmaceutical Marketing

The pharmaceutical marketing industry is vast and complex, with a wide range of stakeholders and activities involved in promoting and selling drugs and medical devices.
Its size and composition are influenced by various factors, including regulatory environments, technological advancements, and consumer behavior.

Size of Pharmaceutical Market :

The global pharmaceutical market is estimated to be worth trillions of dollars annually. While precise figures for the pharmaceutical marketing industry are difficult to ascertain due to its multifaceted nature and varying definitions, estimates suggest that pharmaceutical companies allocate a significant portion of their revenue towards marketing and promotion.

According to some estimates, pharmaceutical companies spend tens of billions of dollars each year on marketing and promotion globally. This includes direct-to-consumer advertising, direct-to-physician marketing, medical education and conferences, key opinion leader (KOL) engagement, digital and social media marketing, and patient support programs.

Composition of Pharmaceutical Marketing :

The pharmaceutical marketing landscape consists of various components:

1. Direct-to-consumer advertising:
This involves promoting drugs directly to patients through channels such as television, print media, and online platforms. However, it's important to note that direct-to-consumer advertising of prescription drugs is restricted or banned in many countries, due to concerns about its potential to mislead consumers and encourage inappropriate medication use.

2. Direct-to-Physician (DTP) Marketing:

This involves pharmaceutical sales representatives visiting physicians to provide them with information about their products, offer samples, and sponsor educational events. DTP marketing plays a significant role in influencing prescribing practices, but it has also faced criticism for potential conflicts of interest.

3. Medical Education and Conferences:

Pharmaceutical companies frequently sponsor medical conferences, continuing medical education (CME) programs, and other educational initiatives aimed at healthcare professionals. These events serve as valuable platforms for disseminating information about new therapies and advancements in medical science. However, ethical considerations necessitate a clear demarcation between educational content and promotional activities to maintain the integrity of medical education.

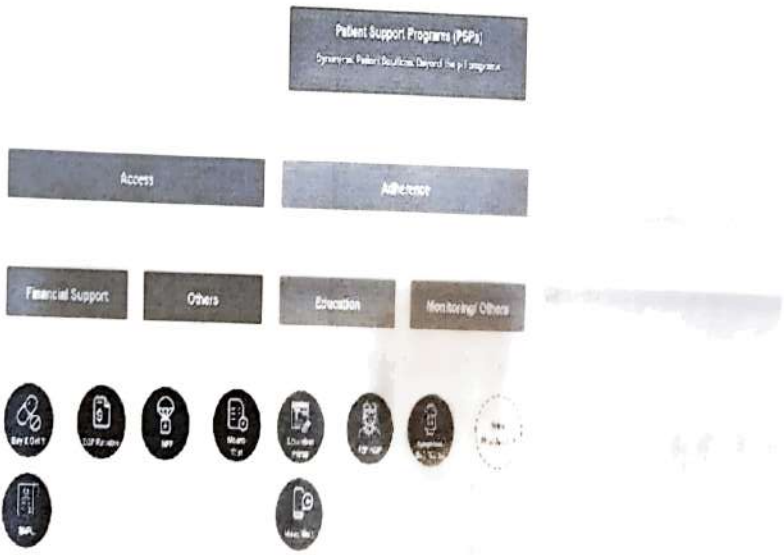
4. Key Opinion Leader (KOL) Engagement:

Collaborations with influential healthcare professionals, known as key opinion leaders (KOLs), constitute an integral component of pharmaceutical marketing. KOLs, by virtue of their expertise and reputation, can significantly impact prescribing practices. Pharmaceutical companies engage KOLs in speaker programs, advisory boards, and clinical trials to leverage their influence and promote their products.

Pharma Social Media Strategy:
THE COMPLETE GUIDE

5. Digital and Social Media Marketing:

The ubiquity of digital platforms among healthcare professionals and patients has prompted pharmaceutical companies to expand their marketing efforts into the digital realm. Websites, social media platforms, and mobile applications are increasingly utilized to deliver targeted messaging, foster online communities, and facilitate personalized interactions. Digital marketing offers unparalleled opportunities for data collection and analysis, enabling pharmaceutical companies to refine their marketing strategies and enhance customer engagement.



6. Patient Support Programs:

These programs are designed to provide patients with comprehensive support services, including assistance with medication access, adherence, and disease management. While patient support programs offer valuable resources to patients, they can also indirectly promote pharmaceutical products by fostering positive brand associations and reinforcing medication adherence

INTRODUCTION

~Dry skin makes the skin look and feel ***rough, itchy, flaky or scaly***. The location where these dry patches form vary from person to person. It's a common condition that affects people of all ages.

~Dry skin, also known as ***xerosis or xeroderma***, has many causes, including cold or dry weather, sun damage, harsh soaps, and overbathing.

~You can do a lot on your own to improve dry skin, including moisturizing and practicing sun protection year-round. Try various products and skin care routines to find an approach that works for you.

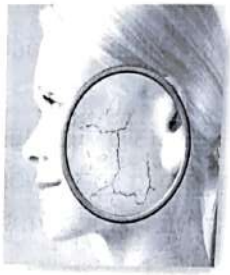
COLLEGE OF

SYMPTOMS

*A feeling of ***skin tightness.***
*Skin that feels and looks ***rough***.
*Itchiness (pruritus)
*Slight to severe ***flaking skin***, which causes the ***ashy look*** that can affect dry brown and black skin.
*Slight to severe ***scaling or peeling***.
*Cracked ***"dry riverbed"*** look to leg.
*Fine lines or cracks.
*Skin that ranges from reddish on white skin to grayish on brown and black skin.
*****Deep cracks*** that may ***bleed***.



COLLEGE OF

CAUSES OF THE DRY SKIN

~Heat: Central heating, wood-burning stoves, space heaters and fireplaces all reduce humidity.
~Environment: Living in cold, windy conditions or low-humidity climates.
~Too much bathing or scrubbing: Taking long, hot showers or baths or scrubbing your skin too much can dry your skin. Bathing more than once a day can remove the natural oils from your skin too.
~Harsh soaps and detergents: Many popular soaps, detergents and shampoos strip moisture from your skin because they are formulated to remove oil.
~Other skin conditions: People with skin conditions such as atopic dermatitis (eczema) or psoriasis are more likely to have dry skin.
~Medical treatments: Some people develop dry, thick skin after undergoing treatment for cancer, receiving dialysis or taking certain medications.
~Aging: As people age, the skin thins and produces less of the oils needed for the skin to retain water.

RISK FACTORS

- Age over 40, as the skin's ability to retain moisture diminishes with age.
- Live in cold, windy conditions or low-humidity climates.
- Have a job that requires you to immerse your hands in water, such as nursing or hairstyling
- Use your hands to work with cement, clay or soil.
- Swim frequently in chlorinated pools.
- Have certain diseases or conditions, such as hypothyroidism, diabetes or malnutrition.

COMPLICATIONS

~ Dry skin is usually harmless. But when it's not cared for, dry skin may lead to:

~ Atopic dermatitis (eczema). If you're prone to develop this condition, excessive dryness can lead to activation of the disease, causing a rash and cracking skin.

Infections:

~Dry skin may crack, allowing bacteria to enter, causing infections.

~These complications are most likely to occur when your skin's protective mechanisms are severely compromised. For example, severely dry skin can cause deep cracks or fissures, which can open and bleed, providing an avenue for invading bacteria.

COLLEGE OF

PREVENTION

~ *Moisturize:* Moisturizer seals in water to help keep your skin's protective barrier healthy. Use moisturizer throughout the day, especially on the hands. And before going outdoors, use a moisturizer that contains sunblock or a broad-spectrum sunscreen with an SPF of at least 30, even on cloudy days. Apply sunscreen generously and reapply every two hours — or more often if you're swimming or sweating.

~ *Limit water exposure:* Keep bath and shower time to 10 minutes or less. Use warm, not hot, water. Rinse and pat dry. Try to bathe no more than once a day.

~*Use a gentle cleanser or allergen-free soap:* Try a nonsoap cleansing cream or shower gel. Or use fragrance-free moisturizing soap with no alcohol or allergy-causing substances (hypoallergenic soap), especially if you handwash often. Rinse thoroughly and pat dry. Apply a moisturizing cream while your skin is still damp.

COLLEGE OF

PREVENTION

~ *Shave with care, Shaving can be drying:* If you shave, use a lubricating agent before you start. Shave in the direction of hair growth, unless that irritates your skin. Use a sharp blade and rinse it with warm water after each stroke. When done, apply moisturizer.

~ *Cover as much skin as possible in cold or windy weather:* Harsh weather can be especially drying to skin. Scarves, hats, and gloves or mittens help protect your skin when you're outdoors.

~ *Wear gloves:* Protect your hands with suitable gloves when gardening, using harsh cleansers and doing other skin-drying activities.

COLLEGE OF

PREVENTION

~ *Rinse and moisturize after swimming:* This is especially important if you've been swimming in a heavily chlorinated pool.

~ *Drink when you're thirsty:* Drink noncaffeinated beverages each day to help keep all your body's tissues, including your skin, well hydrated.

~ *Bath babies with care:* For babies, using a cleanser every 1-2 weeks for bathing usually is enough. Otherwise, bathe them in just water. However, clean their diaper area with each diaper change. Apply a thin layer of petroleum jelly (Vaseline, Aquaphor, others) while the skin is still damp.

COLLEGE OF

MOISTURIZING CREAM

~A moisturizing cream purports to ***maintain the moisture content*** of the skin and prevent a dry skin condition by absorption of moisture.

~Since most of the water contained in a cream is lost by evaporation almost immediately during and after application, the product ***must provide a non-volatile residual film*** capable of retaining a high proportion of normal skin moisture and part of the moisture which is applied directly by the product.

COLLEGE OF

MOISTURIZING CREAM

~Moisturizing cream is known that the water (or moisture) content of the skin is responsible for keeping it ***soft and flexible***, and
~A dry skin condition is not necessarily corrected by the use of fatty creams alone.
~A ***fatty cream helps to retain moisture*** in the skin by preventing- its loss by evaporation and although this type of treatment is used at night it is not practical for daytime use.
~They are intended to help ***preserve the skin*** in a soft, supple condition and allay formation of lines and wrinkles.
~The ***moisture on the skin is retained by using humectants*** which play a major role.

COLLEGE OF

SUMMARY

~Dry skin is a common health complaint. It happens when the skin does not get the moisture or oils it needs to maintain itself. Dry skin might be red, scaly, itchy, or even painful.

~Environmental factors, such as cold weather or dry air, can cause dry skin. It may also be due to health conditions, including eczema, dehydration, and diabetes.

~People can resolve most cases of dry skin by taking simple steps, such as using moisturizer. Sometimes, however, people might need prescription-strength medication.

~People should contact a doctor if they find that their dry skin does not get better with home treatment or interferes with their everyday life.

~HOME REMEDIES FOR DRY SKIN.

Personal Counselling

Venue: Heritage Building
Date: Academic Year 2023-2024

Personal Counselling is focused on students' personal issues related to emotional/mental health, concerns regarding academic issues, stress, etc. Few students in need of counselling from B.Pharm (1st Sem) and Pharm.D (1st Year) were personally counselled. It is a 1-1 discussion between the counsellor and student, who is the person seeking help, enabling personal growth. Each session can last between 45 and 60 minutes. Frequency and follow-up of therapy depends on the student's needs, goals and progress. Concerns are resolved with short term therapy, and more complex concerns require periodic follow-ups, before improvement is realized. Students seeking help will be offered the first available appointment.

Counselling services are provided by qualified and licensed psychologists and therapists. Counselling means being confidential, respectful, empathetic and non-judgmental with clients, creating a safe and supportive environment for their concerns and issues.

The counsellor supports students in helping them resolve crisis, reduce feeling of distress and improve their sense of well-being. As a professional counsellor, building a relationship with the student/counselee begins with understanding their situation and then explore how to move forward and assess them in changing their thinking, emotional responses and behavior. More the commitment shown by the student towards seeking timely help, the more likely the appropriate outcome is reached. After the initial meeting with the student/counselee, goals are established to provide direction, help and monitor progress in counselling sessions.

No. of students Participated: 9

Faculty In charge: Mrs. Meena Arun, Counsellor, COPS

Outcomes:
Counselling has offered students the opportunity to change by establishing specific goals, improving coping skill, promoting decision making and improving relationships. In some cases, positive changes have come about with periodic follow-ups and with some just with one or two sessions.

2.2.1 The institution assesses the learning levels of the students and organises special Programmes for advanced learners and slow learner

The college assesses the learning levels of the students at the time of the results of internal examinations . Students enrolled in college are identified as slow and advanced learners based on their marks and overall performance each year. This helps to identify the slow learners and to design special coaching sessions or tutorial sessions to bridge the gap between the slow learners and the advanced learn ers. The tutors of the respective classes of UG and PG extend valid support in classifying the student s with reports based on observation and class tests.

The institution organizes Orientation programmes/Induction programmes for fresher's at the college level. The facilities in the college and the scope of the subjects being learnt are introduced in these sessions. Apart from this, sessions are also included to inculcate positive attitude and competitive spirit. This process helps as a base for monitoring the future progress of the students.

Strategies adopted for slow learners

- Remedial Classes are conducted with an aim to improve the academic performance of the slow learners, absentees and students who participate in sports and other activities. This practice helps the struggling learners to improve subject knowledge and helps them catch up into their peers.
- Group Study System is also encouraged with the help of the advanced learners.
- Academic and personal counselling are given to the slow learners by the tutor, mentor and the counselling cell. Bilingual explanation and discussions are imparted to the slow learners after the class hours for better understanding.
- Provision of simple and standard lecture notes/course materials on LMS

Policy for Identifying Slow and Advanced Learners:

1. Identification of Slow Learners

Criteria for Slow Learners:

- A **score of below 20 marks** in any course in the current semester.
- Having **three or more backlogs** (arrears) from previous semesters.

Support Measures for Slow Learners:

- **Remedial Classes**: Additional tutorials and remedial sessions tailored to address individual learning gaps.
- **Mentoring and Counselling**: Personalized guidance from faculty and academic mentors to help improve performance.
- **Study Material and Resources**: Provision of extra learning materials, including online resources and reference books.
- **Peer Tutoring**: Encouraging peer-to-peer support where advanced learners help slow learners understand key concepts.

2. Identification of Advanced Learners

Criteria for Advanced Learners:

- Actively engaging in **workshops**, **seminars**, or pursuing **MOOC courses** (Massive Open Online Courses) beyond the prescribed curriculum.
- **Winning or excelling in technical competitions**, such as **ideathons**, **hackathons**, or any recognized technical contest.
- Demonstrating a strong ability in **research**, **innovative projects**, or contributing to **industry-related knowledge**.

Introduction:

Mentors are student-centric teacher- friends who help young adult learners in their transitory phases and challenging times. It is based on mutual trust and respect. It has been introduced for obtaining a holistic assessment of the learners' performance and providing inclusive spaces for growth and development. Mentors guide the mentee through interpersonal engagement.

Scope:

The Mentor – Mentee policy is applicable till the Mentor or Mentee (both) are on regular roll in the university. However, Mentor [on his own interest] may support the mentee on his interest [based on the request from the Mentee] even after the completion of the course from the university.

Objectives:

- To develop healthy relationship between students and teachers
- To ensure academic and professional performance of the students
- To inculcate the human values among the students
- To acclimatize the new students to the college campus
- To provide academic counselling
- To enlighten the students on professional ethics and conduct
- Providing emotional support to students on individual basis
- Helping students to overcome home sickness
- Establishing rapport between teachers, students & parents
- Monitoring attendance and behavioral aspects of every student
- Identifying weak areas and working out remedies helping students thereby taking their complete care.
- Active and constant participation of the parents is always encouraged and appreciated.

Role of Mentor:

1. Mentor has to Schedule Mentorship Meeting as per the Date mentioned in the Calendar of Events and Time table slot. Circulate the information to allocated students.

2. He shall ensure the information like attendance, IA marks etc., related to Mentee assigned.
3. He shall counsel the mentee-based questionnaire provided in ERP [just for reference, but not limited to], which may be related to Academic, Mental, Physical, Emotional, family and Personal.
4. Collect individual achievements certificates if any like sports/extracurricular activities.
5. Take care of mentees attendance and other matters with sufficient evidences and provide on request from other faculty or higher ups for department work.
6. Liaison between institute and the parents of the allotted mentees.
7. Identify reasons for poor performance & maintain a note in ERP (Like Illness, domestic disturbances, personal obstacles & so on). Counsel the students to improve their marks.
8. To monitor whether allotted mentees if they are falling under Slow learners' category are attending the Remedial Class and other support that can be extended to him for improvement in performance.
9. Plan for the activities that will encourage the bright students or Advanced learner.

Roles of Mentee:

1. Voluntarily participate in the mentorship activity.
2. Update his performance in academics, co and extra-curricular activities.
3. Express his satisfaction and also difficulties being faced in curricular, co and Extra- curricular activities.
4. Seek the inputs from the mentor, which will help in overall development of oneself
5. For any irregularity in the work because of any reason, the mentee shall inform and provide all documents to the Mentor.

Encouraging Bright Students /Advanced Learners and Supporting Slow Learners

The mentors have to identify Advanced and slow learners and share this information to the class advisors to take the following measures

Slow Learners (failed in more than three subjects in SEE/ SGPA less than or equal to 6 and First IA 1performance below 50% of Total Marks)

Special measures taken to support relatively slow learners:

- Organizing Extra classes, Remedial and Tutorial Classes to clarify the doubts and enhance their learning and ensure they perform well in the examination.
- Provide online video links of the lectures of faculty members from premier institutes to improve basic understanding of subject.
- Provide additional study materials, Practice Papers and question bank in order to boost the confidence of the Slow learners.
- Encouraging them to participate in the online platform for technical assessment and remote interview solutions like Hacker Rank, Hacker Erath etc. for self-assessment. This also will help in building their resumes.

Advanced Learners (Top 10% of the SEE results)

Organizing Special Program for advanced Learners to augment their talent and meet their learning needs.

- To Encourage selected Advanced Learners to undertake research projects.
- Motivate students to participate in Conferences and other National and International competitions.
- Encourage students to make research contributions in their major project at the UG level and publish their results in journals and also present it at National and International Conferences.
- Provide opportunities to participate in Hackathon, Workshops and other events.
- Motivating and guiding students to target for University Ranks.
- Motivating the students to take up higher studies in premier organizations.
- Provide opportunities to learn and exhibit Leadership qualities in various department and university level activities.

The details will be communicated to the candidates and their mentors through email separately. The fellowships can be commenced from 1st Feb,2024 onwards, subject to completion of due formalities.

2.2.1 The institution assesses the learning levels of the students and organises special Programmes for advanced learners and slow learners

The institution employs a structured policy to identify slow and advanced learners through diagnostic tests, internal assessments, and class performance reviews. This ensures targeted support based on individual learning needs. For slow learners, remedial classes, bridge courses, and one-on-one mentoring sessions are organized to strengthen foundational knowledge and boost confidence. Advanced learners are encouraged to participate in research projects, specialized training, and advanced electives, including MOOCs, to enhance their academic potential. Evidence of these initiatives includes attendance records, session reports, photographs, and certificates of participation. The institution also provides a comprehensive course chart detailing program dependencies, prerequisites, and specialization options to guide academic progression effectively. The Centre for Bridge Courses and Personal Counselling Cell regularly conducts events, supported by detailed reports, attendance with signatures, and event photographs. These efforts foster an inclusive learning environment, ensuring all students achieve their academic goals.

ENCOURAGING FAST LEARNERS AND SUPPORTING SLOW LEARNERS

Policy & Guidelines

1.0 Preamble

The School of Engineering at DSU strives to improve and increase the learning capacity of students by motivating the faculty to adopt new-age pedagogy focusing on a combination of traditional and modern teaching approaches such as use of audio-visual aids like power point presentations, videos, flipped learning, and so forth, that not only help maintaining the attention span of students but also help in grasping the concept in a better way.

Fast learners (or Advanced learners) are the students who understand concepts relatively faster than the other students in the class and attain high scores. While slow learners on the other hand, mostly they lag behind in their academic pursuit and find it difficult to understand the course. Therefore, we at SoE assess the learning capacity of the students and provide them guidance accordingly.

2.0 Objectives

1. To identify the slow learners and fast learners (or advanced learners) in the class.
2. To develop important strategies that can benefit both the slow and the fast learners.
3. To enhance the confidence of slow learners and help them to enhance their skills in respect of learning processes.
4. To encourage fast learners to make difference in their careers.

3.0 Identification of Slow and Fast Learners

A. Slow Learners

- During first semester, Internal Assessment Test-I(IAT-I) performance is below 50% in three or more courses. While from 2nd semester onwards, students failed in three or more courses in SEE or SGPA is less than or equal to 6 and IAT-1 performance is below 50%
- Limited self-direction
- Lagging behind in dealing with higher order problems

B. Fast Learners(or Advanced Learners)

- Top 10% in the test scores / SGPA / CGPA
- Self-motivated
- High potential to deal with higher order problems

4.0 Strategies for attempting Slow and Fast Learners

A. Slow learners

- **Conduction of Remedial classes:**
  - To provide students with the support they need to succeed academically and enhance their learnings and ensure they perform well in the examination.
  - Making the remedial classes effective: Incorporate Peer Tutoring, Frequent Assessments, Use the Best Teaching Strategies, Frequent Feedback, Make

Classes Engaging, Parental Involvement, Have realistic goals and holding them accountable for their progress, and Reward Students

- **Providing extra resources**
  - Provide online video links of the lectures of faculty members from premier institutes to improve basic understanding of the course.
  - Provide additional study materials, practice papers and question bank in order to boost the confidence among the students
- **Guidance through mentor-mentee scheme**
  - Mentoring and connecting with faculty members would set up a healthy relationship between the students and the faculty.
- **Participating in activities to enhance their skills**
  - Encouraging them to participate in an online platform for technical assessment and remote interview solutions like Hacker Rank, Hacker Erath etc. for self-assessment.
    - **NOTE:** After the university result declaration of the current semester, faculty shall prepare a report that shows the improvement in performance of slow learners to close the loop.

B. Fast Learners

- To augment their talent and meet their learning needs.
- To make innovative solutions and develop new solutions based on new technological advances.
- Motivate to participate in various technical events, online courses like Coursera, NPTEL, Value-added course etc. Hence, involving them to carry out online certification programmes.
- Motivate students to participate in Conferences and other National and International competitions
- Encourage students to make research contributions in their major project at the UG level and publish their results in journals and also present it at National and International Conferences.
- Provide opportunities to participate in Hackathon, Workshops and other events.
- Motivating the students to take up higher studies in premier organizations.Provide opportunities to learn and exhibit leadership qualities in various department and university level activities.

5. Discussions and Conclusions

We believe that this policy may bring positive impact and it is expected for the fast and slow learners that there will be an overall improvement in university results and their future careers. Following documents should be maintained:

- List of slow learners.
- List of fast learners.
- Report of result of continuous internal assessment.

Bridge Course: Advances in Refrigeration and Air Conditioning Technology

Duration: 8 Hours

Target Audience: 4th Semester Mechanical and Aerospace Engineering Students and Faculty Members

Organized by: Department of Mechanical Engineering and Aerospace Engineering, ISHRAE Student Collegiate Club Activity, SOE-DSU

Overview:

This 8-hour bridge course is designed to provide participants with in-depth knowledge of the latest advancements in refrigeration and air conditioning technology. The course will include expert insights, research findings, and practical applications in the field, empowering attendees to contribute effectively to technological advancements.

Course Structure:

Hour 1: Welcome and Introduction

- Welcome note by **Dr. Vinayak B. Hemadri**.
- Overview of the importance and scope of refrigeration and air conditioning technologies.

Hour 2: Fundamentals and Recent Advances

- Technical session by **Dr. Srikanth Narayanasamy**, focusing on:
  - Basic principles of refrigeration and air conditioning.
  - Emerging trends and technologies in the field.

Hour 3-4: Evaporative Cooling and Ventilation

- Detailed explanation of evaporative cooling systems.

CHAIRPERSON

- Case studies on advanced ventilation techniques.
- Industry insights on energy efficiency in cooling systems.

Hour 5-6: Practical Applications

- Discussion on real-world applications of refrigeration and air conditioning technologies.
- Insights into system design, operation, and maintenance from Dr. Srikanth Narayanasamy's extensive experience in MEP and energy efficiency at BOSCH.

Hour 7: Research and Development in Air Conditioning

- Overview of research findings and innovations in refrigeration and air conditioning systems.
- Role of organizations like ASHRAE and ISHRAE in promoting advancements.

Hour 8: Q&A and Closing Remarks

- Interactive Q&A session with Dr. Srikanth Narayanasamy.
- Summary of the course and future directions in the field.
- Vote of thanks and distribution of participation certificates.

Speaker Profile:

Dr. Srikanth Narayanasamy

- A distinguished professional with over 35 years of experience in MEP and energy efficiency.
- Technical Member of ASHRAE and ISHRAE specializing in evaporative cooling and ventilation.

CHAIRPERSON

DAYANANDA SAGAR
UNIVERSITY

- Recognized as an awardee of GREAT PLACE TO WORK and served as an ASHRAE BOG Member during SY 2013, 2017, and 2021.

Learning Outcomes:

- Understanding the fundamentals and recent advances in refrigeration and air conditioning.
- Practical insights into energy-efficient cooling and ventilation systems.
- Exposure to cutting-edge research and industry best practices.

This bridge course provides an excellent opportunity for participants to enhance their skills and knowledge, aligning academic learning with industry standards.

School of Commerce and Management Studies – PG

Policy on Advanced learners and Slow Learners

Introduction

The Policy on Advanced and Slow Learners is a set of guidelines and strategies implemented by School of Commerce & Management Studies, Dayananda Sagar University to address the unique needs of students with varying learning abilities. This policy aims to create an inclusive and supportive learning environment where all students can thrive and reach their full potential.

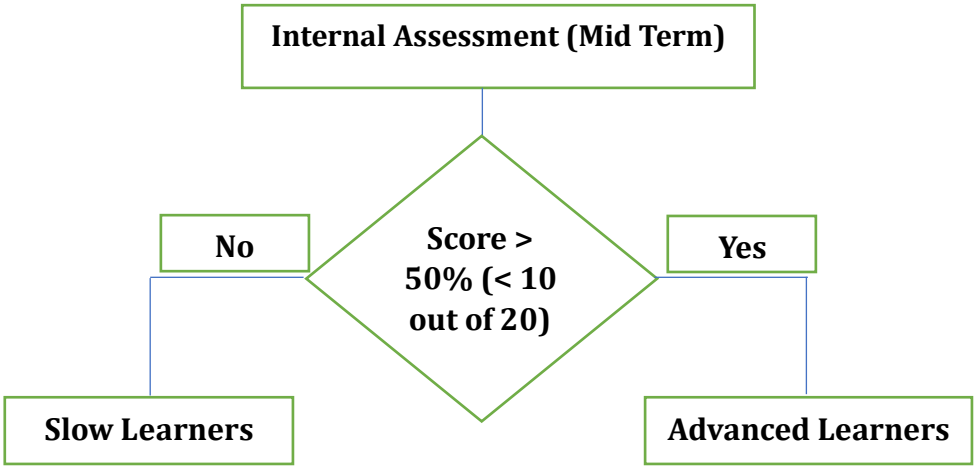
For advanced learners, the policy focuses on providing opportunities for enrichment and acceleration. This may include offering advanced courses, independent study options, or mentorship programs. The goal is to challenge and engage advanced learners by providing them with more complex and stimulating learning experiences.

For slow learners, the policy emphasizes the importance of personalized support and additional resources. This may involve implementing differentiated instruction techniques, providing extra time for assignments and assessments, or offering remedial classes. The aim is to ensure that slow learners receive the necessary assistance and accommodations to help them overcome challenges and succeed academically.

The Policy on Advanced and Slow Learners recognizes that every student has unique learning needs and abilities. It promotes a student-centered approach working collaboratively to identify and address the specific requirements of each student. By implementing this policy, school strive to create an inclusive and equitable learning environment that supports the growth and development of all learners.

Methods of assessment

The students can be assessed to identify their learning levels by below mechanism.



Advanced Learners:

The term advanced learner in this policy refers to the students who can engage learning activities faster than the other students in the class and achieve high scores and make significant achievements in their life. They are more potential with their comprehension, retention, memory, critical thinking, creativity and contextualization practices. They also may have hard working behaviors and usually achieve more than the majority of the classmates. These students are in a great extend gifted and talented than the others in the class. These students can take up higher level learning and academic responsibilities. They can bring some new concepts, strategies, and also can take the leadership in the teaching learning activities.

The slow learners are always the poor achievers and lag behind with the academic life. They may fail in exams or will score only poor grades. They will find it difficult to understand the lessons and may have difficulties in their comprehension, retention, reproduction and integration. They may fail in articulations and critical reflections.

Their motivation levels also may be poor and may find it difficult to adjust with the teaching learning process and can drop out or fail in the programme. The poor performance may not be a sign of the poor capacity or talent but may be due to inappropriate teaching methods, poor family situations, inadequate motivations and

supports, unscientific learning practices or even the inability to converse in an unfamiliar language

Assessment of the learning levels of the students:

* Slow learner and advanced learners would be identified for each subject separately by respective course handling professor for all the semesters.
* Process to identify of slow learners and advanced learners would be conducted immediately after declaration of mid semester exam result.
* The student securing marks below 50% would be identified as Slow Learners and the student securing marks above 50 % would be identified as Advanced Learners.
* After that separate list are prepared for both type of learners for further monitoring and conduction of problem solving sessions / revision sessions for them.

Conduction of activities for slow learners

* Provisions should be made on daily time table by adding extra 45mins to conduct remedial classes
* Personal Attention should be provided by respective course handling professor in teaching
* Assignments and solving University question papers
* Question bank

Conduction of activities for advanced learners

* Advanced assignments or tasks should be assigned to advanced learners
* Encouragement to complete MOOC/Advanced courses
* Encouragement Participation in Seminars/Conferences/professional Events
* Assignment based on Case studies
* Field Visits and internships
* Platform to be provided through MoU's with various reputed Industries/ Research institute for the advanced learners to explore their talents.
* Exposure to work on consultancy project.

Documents to be maintained

* Report of marks obtained based on above parameter

* List of slow learners
* List of Advanced Learners
* Schedule of activity for slow learners
* Attendance record for session conducted for slow learners

1. Title: Statistics for Managers (Bridge Course)
2. Date: 18th October, 2nd ,3rd, 8th 15th November
3. Time: 11AM-12 PM
4. Brief Description:

Introduction:

The Statistics for Managers Bridge Course was designed and conducted for MBA first-year students to address the gap in their statistical knowledge, especially for those who did not have prior exposure to the subject during their undergraduate studies. The course aimed to provide a solid foundation in statistical concepts and methodologies, equipping students with the necessary skills to excel in their MBA coursework and future managerial roles.

Objective:

The primary objective of the bridge course was to familiarize students with fundamental statistical principles and tools, fostering a comfortable learning environment for those entering the MBA program with varying levels of statistical background.

Course Structure: The bridge course was structured to cover essential statistical topics, including but not limited to:

Key Statistical Concepts; Use of Statistics, Types of Data; Graphical Representation, Measures of Central Tendency, Measures of Variability, Measures of Shape.

Outcomes:

The Statistics for Managers Bridge Course successfully equipped MBA first-year students with a foundational understanding of statistical concepts. Post-course assessments indicated a significant improvement in students' statistical knowledge, boosting their confidence to engage with quantitative aspects of their MBA curriculum
